PRIMARY EXAMINER

1. This communication is in response to Applicants' Preliminary Amendment and Response to Final Office Action dated 13 July 2004. Claims 1-15 were canceled and claims 16-20 are pending.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The closest prior art of record shows:

(1) a method of assigning input/output as defined in a C-type program to specific wires in an HDL synthesizable design (Panchul et al, U. S. Patent 6,226,776);

(2) a graph-theoretic approach for register file-based synthesis using a port assignment modeled by a weighted clique partitioning problem (Ravikumar et al, "A Graph-Theoretic Approach for Register File Based Synthesis");

(3) a method of global register allocation by analyzing a register conflict graph hierarchically based on the parse tree of the input program (Zobel, "Program Structure as Basis for Parallelizing Global Register Allocation"); and

(4) a method of design space exploration for multiport memory synthesis using a partitioned dependence matrix (Chen, "Allocation of Multiport Memory With Ports of Different Type in Register Transfer Synthesis").

2.1 Applicants' set of claims consists of claims 16-20.

Art Unit: 2123

Independent claim 16 is directed to a method for automatic synthesis of a register file and functional unit-register file connect in a processor. This claim identifies the distinct step of: “programmatically computing a resource allocation of register ports in the register file types to read/write port requests, including determining how to share a register port for two or more functional unit ports based on the specification of instruction level parallelism among the specified processor operations”.

Because the closest prior art does not appear to teach or suggest the allocation of register ports including determining how to share a register port based on the specification of instruction level parallelism, claims 16-20 are deemed allowable.

3. Any comments considered necessary by Applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
